

ASH GROVE CEMENT WEST, INC.

Inter-Office Memorandum

Date September 19, 1989

To Dick Cooke

From Jim Post 

Copies to Steve Sheridan

Subject **WEST SEATTLE TERMINAL
ENVIRONMENTAL STATUS**

I asked Ken Rone to review our West Seattle terminal environmental status and especially our air emissions status.

Ken reports that dust emissions from the hold of ships being unloaded violates the regulations at times. Gary Eathorne of Lone Star said their employees have overheard the PSAPCA inspector say that if he had more time, he would cite Ash Grove for emissions.

Since the penalty for exceeding air emission limits can include a restraining order, I believe we should review the problem thoroughly and have our course of action all set if we run into problems with PSAPCA.
